He has just graduated two years ago.

Last year, one of the boys asked him some question he understood. "Me—I don't understand that. I'll ask Pa about it."

The professor of chemistry is Chandler. About once every two or three months he goes on a champagne hunt for a couple of days.

All he does however is to lecture to the freshmen so it will not affect me in class.

I got my class picture, my photo is pretty good.

It has been very rainy the last week, extremely so. This is the foggiest town I ever saw.

I suppose we'll see the sports on Anacostia Island. I am sleepy and had to work into last night as it was my hardest night.

Give my love to Miss Tuzzy, Uncle Willard, Mamada Will and yourself.

Your love,

[Signature]

P.S. Please send me a social meeting programme. Where is Eugene Eugene.
 SOUTH, Bethlehem, Pa.
 Oct 23, 90,

 Dear Papa,

 I got your letter Oct. 11th. I think I like the one "For Engineers." 20th of an inch — 1-500 of a foot, and 20ths of an inch.

 Last night we were to have recitations Prof. At last it was his anniversary of his wedding. The boys did not find out until late, one did not grover. Hallowe'en we are going to have a procession of ghosts etc. The 30th comes on my easiest, but Thursday is just my luck.

 I have gone into sort of half training both spring sports. I don't run any fastly or hard things and to have leisure in the gymnasium each day. I feel a good deal better and find that it is not so hard to study, see through things easily. The football team is training hard.

 Corduroy brown team, plays half back on the team. I am getting on first rate in my studies. I shall be ready to go. I have been over every three weeks.

 Heir to son of the professor of Math.
